ABOUT ME

I am Highly motivated Computer Engineering student proficient in programming, algorithms, and machine learning. Seeking a challenging role to leverage technical skills in software development, AI, and scalable ML solutions. Eager to collaborate on real-world projects and continuously enhance expertise, bringing experience in various programming languages and ML frameworks.

EDUCATION

Vishwakarma Government Engineering College Bachelor of Engineering in Computer Engineering CPI: 9.13 • Relevant coursework: DSA, Computer Networks, DBMS, OS, OOP, Data Mining	Ahmedabad, India 2027
Bhagwati Vidyalaya HSC (PCM) Percentile Rank – 96.39	Ahmedabad, India 2023

SKILLS

Programming Languages: Python, Java, JavaScript
Libraries / Frameworks: Scikit-Learn, FastAPI, TensorFlow, Keras, Streamlit, React, Express.js
Database & DevOps: PostgreSQL, MongoDB, Git, GitHub, GCP, Docker

UNIVERSITY PROJECTS

Daily Intelligence <i>Python, FastAPI, Next.js, LangChain, PostgreSQL (pgvector)</i> • Built an AI news aggregator using LangChain for automated feed ingestion, semantic vector clustering, and an adaptive, newspaper-style layout with dynamic importance scoring • Developed a multi-scope RAG chat interface enabling users to query grounded news sources with real-time streaming and citations. • Project Link: daily-intelligence-five.vercel.app Github	2026
Exoplanet Detection <i>Python, Scikit-learn, XGBoost, optuna</i> • Engineered an end-to-end ML pipeline to detect exoplanets from NASA Kepler light-curve data using XGBoost and ensemble classifiers. • Improved exoplanet detection by engineering light-curve features, applying SMOTE for data imbalance, and optimizing the model with Optuna. • Project Link: exoplanet-detection-kepler.streamlit.app Github	2026
Agenticpilot <i>React, Next.js, Supabase, LangGraph, Google APIs</i> • Developed a scalable automation platform for Gmail replies and social media scheduling (X, LinkedIn) using Next.js, React, and Supabase. • Integrated LangGraph for AI automations and implemented OAuth to securely manage third-party API access and content workflows. • Project Link: agenticpilot.app Github	2025

Activities

- **VGEC E-Cell (2025 - Present)**
 - Built and updated the official E-Cell website to handle online event registrations.
 - Managed student sign-ups and created digital certificates for all event participants.

CERTIFICATIONS

• Cyber Gyan, C-DAC Workshop	2023
• AWS Certified Cloud Practitioner Essentials	2025
• AWS Educate Machine Learning Fundamentals	2026
